

EcoLogic W/B Speed Enamel Semi-Gloss Trim White

General Properties

EcoLogic Water-Based Speed Enamel is a fast drying alkyd resin-based product designed primarily for spray application to architectural millwork, trim, doors and railings where a tough, durable coating is required. This product has very good non-blocking characteristics (face-to-face sticking) as well as low grain raising on wood. The product is very quick drying with very good stacking and handling times.

Recommended Uses

Recommended for interior application to pre-primed finger joint or MDF mouldings, casings, trim boards, railings or spindles. Also highly recommended for wood or composite passage doors or cabinets. This product can also be used on properly prepared metal substrates. Consult your Cloverdale representative.

70360**Recommended Primer**

681500 EcoLac Primer, or 15130 Alkyd Stain Blocking Primer. Can be applied directly to factory-applied primers moulding and door primers.

Surface Preparation

Surface must be clean, dry and free of sawdust or other contaminants. Pre-primed mouldings can be sprayed directly or re-primed using 681500 EcoLac Primer White or equivalent. A light scuff sanding using 220 grit paper is recommended between coats. Existing gloss alkyd or lacquered surfaces must be sanded before coating. A stain-blocking primer is recommended when applying directly to cedar.

Limitations

Do not apply at temperatures at or below 10C. Keep Product from freezing. This product will exhibit a slight degree of yellowing when exposed to darkness - typical of an alkyd paint.

Mixing Instructions

Mix well before use. Probe container bottom with a stir stick to ensure pigment dispersion.
