Cloverdale Paint's Premium "non-drip" Ceiling Paint and Pro Fresh Texture & Tile Ceiling Restoration are ideal products for brightening and freshening up any ceiling.

DRIPLESS CEILING PAINT

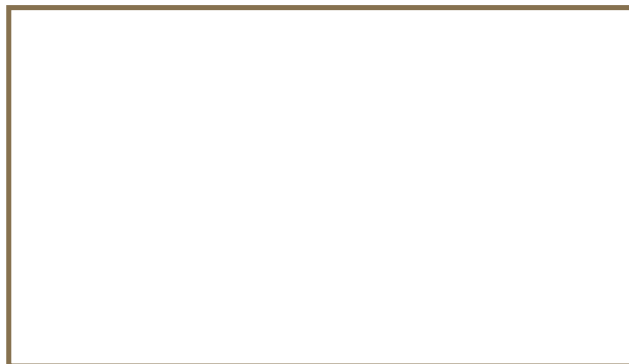

Premium Classic Ceiling Paint was designed with ease of application in mind. This low odour, water clean up, flat latex paint has been specifically formulated to greatly reduce roller splatter, which will often occur when using conventional paints on ceilings. This "non-drip" ceiling paint is high hiding and will dry to a desirable uniform flat finish. With its higher light reflectance and bright white finish use Premium Classic Ceiling paint on previously painted textured ceilings, and new or previously painted smooth ceilings. Premium Classic "non-drip" ceiling paint is easy to use and will revitalize and brighten any room in your home.

PRO FRESH LOW ODOUR ALKYD

Pro Fresh is designed specifically for textured and tiled ceilings. It will not dissolve ceiling texture or give you that "smoothed out" appearance. Pro Fresh is stain blocking and can be applied directly to water or smoked stained ceilings for ceiling restorations. This low odour flat white alkyd can be applied by sprayer or roller and typically will cover in only one coat. Pro Fresh Texture and Tile Ceiling Restoration is widely used by professional restoration companies and professional painters. Pro Fresh is an ideal choice for damaged and stained ceilings or for providing a "fresh new look" to yellowed or dull textured ceilings. Use Pro Fresh for insurance restoration, professional commercial use, or for residential use.
