*Cloverdale Paint's Melamine and Kitchen & Bath are ideal coatings for modernizing cabinets and shelving or painting areas exposed to moisture and high humidity.*

**MELAMINE**

Melamine paint is a urethane-reinforced alkyd, low lustre enamel specifically formulated to give a smooth durable finish. Melamine is ideally suited for repainting cabinets, countertops, furniture and shelving where a smooth, low-sheen, "melamine-like" finish is desired. Excellent application characteristics allow for superior flow and leveling and will also provide superior scrubability, stain and mildew resistance. Melamine is self-priming and will adhere to almost any surface including wood, plastic laminates, fiberglass, ceramics and metal. Melamine can be tinted to thousands of light and medium colours.

See product label for application instructions. If applied to countertops, hot objects or knives may damage the melamine finish.

**KITCHEN & BATH**

Formulated with the latest 100% acrylic technology, Kitchen & Bath paint provides maximum durability with superior stain resistance and washability. It is excellent for areas subject to moisture and high humidity. Kitchen & Bath is also self-priming over aged oil based paints and provides smooth flow and leveling properties making it ideal for trim and molding throughout your home. Kitchen & Bath is also low odour and non-yellowing. It is easy to use and is fast drying allowing you complete your projects quicker. Use Kitchen & Bath on interior walls, ceilings, trim, doors, and cabinets. Choose from thousands of colours. Available in Eggshell and Semi-Gloss finishes.
