

FOR IMMEDIATE RELEASE

Cloverdale Paint Continues Store Operations Expansion into Ontario

Surrey, BC (February 11, 2019) – Cloverdale Paint, Canada’s largest Canadian owned and operated paint and coatings manufacturer announced it has added another company owned store to its Ontario expansion plans. The new facility in Kitchener, Ontario, brings to 71 the total number of wholesale/retail locations the company operates in Canada with a primary focus of servicing professional applicators in both the industrial, protective coatings and architectural segments.

“The paint and coatings industry has changed often through the past decade evolving into only a few foreign, multi-national manufacturers. Cloverdale Paint is proud to have remained a constant in the Canadian markets we serve. Our strength and stability have instilled confidence in our customers and employees alike. We are proud to be the largest Canadian and family owned and operated coatings manufacturer in the country. We are very excited to continue with the company’s expansion plans into the province of Ontario said Martin McKenna, Vice President of Trade Sales and Group Marketing for the company.

The new Kitchener location is located at Unit 5 - 35 Trillium Drive, with easy access to and from the 401. “Cloverdale Paint is proud of the company’s family and home-grown roots. Every employee is a stakeholder and participant in company profits. This means that our employees, on every level, are invested in providing their very best to exceed the expectations of the customers we serve,” said Mr. McKenna.

Situated in the heart of south western Ontario’s manufacturing region, the new Cloverdale Paint Kitchener store location is well positioned to augment other Cloverdale Paint facilities in the area and to provide products and services to Professional Painting Contractors, Industrial applicators, as well as Home Owners alike.
